 - **adjinn presentation and methodology**
 - **Observatório da Publicidade Digital**
 - **Q&A**
-

¿adjinn?

- adjinn is a global provider of digital advertising intelligence products.
 - Our advanced crawling technology provides impartial data in an effort to bring harmony to dissonant data discussions in the the digital ecosystem.
 - This allows global brands, publishers and agencies to fully understand the performance and evolution of both their own digital campaigns and those of their competitors.
-

Global Footprint

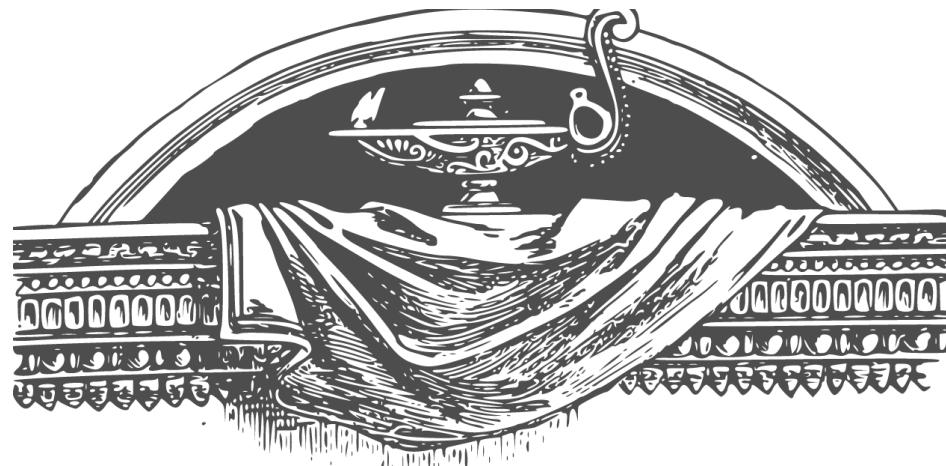

adjinn's crawlers are now active in +20 markets.

What is adjinn?

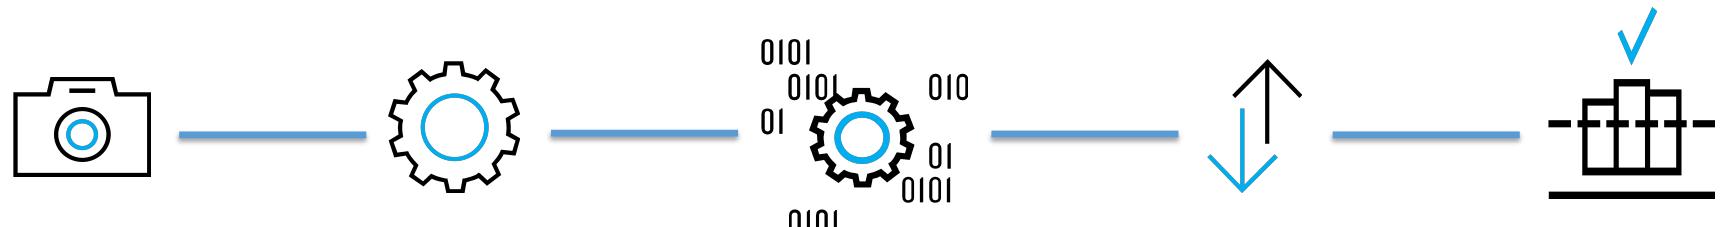

In a Nutshell

adjinn is a **tool** which allows users to **control** their **advertising** efforts by furnishing them **with data** about their Digital Display and Video campaigns across all major sectors and brands.

How it Works?

METHODOLOGY

Crawler
visits defined website
list (Mirroring User
Behaviour)

Automated / manual
coding & classification
of the crawled data

Calculation of
Ad Impressions

Results are reported
daily
Today you can see
yesterday's data

Results are reported
in web-based User
Interface

Crawl Baby Crawl

- Data collection done by a series of **crawlers** (i.e. spiders/robots).
- adjinn visits a market's audited and defined Web site list, **24 hours a day, 7 days a week, 365 days** of the year.
- Approximately **1000 sites** per market.
- Database is **updated every evening** at midnight.
- We crawl and capture more than **2,500 creatives per hour** taking into consideration the following criteria:
 - ★ Sites where the creative was displayed
 - ★ Format
 - ★ Device it was found on (i.e. desktop or mobile);
 - ★ The scroll
 - ★ Visibility
 - ★ Metrics - Ad Impressions, Share of Voice, etc.

Full & Total Control in Real Time

- Empowers users, delineating how their **own digital ad campaigns** and those of your **competitors** are evolving.
- Offers the ability to **change the course** of non-performing campaigns **before they have exhausted their budgets**.
- **Yield learnings** from previous campaign performance to plan for improved **success in the future**.

Do's

Advertising types reported on:

- ★ Display
- ★ Video
- ★ Native
- ★ Programmatic
- ★ YouTube

Ad formats captured:

- ★ Static Image (JPG, PNG)
- ★ Animated GIFs
- ★ HTML5
- ★ All Video
- ★ In Read (Teads)

Don'ts

adjinn does **not** measure or report on:

- **Text Ads:**
 - SEM
 - SEO
 - **Social Media**
 - Facebook
 - Instagram
 - LinkedIn etc. etc.
-

adjinn Data is Apt for:

1. Agencies

2. Brands

3. Publishers

Learning from Crawls

- ★ Total control over your digital and video **ad campaigns**.
- ★ **Where** exactly your ads are running.
- ★ Sheds light on where your **programmatic ads** might be appearing.
- ★ Detailed insights into which **ad formats** are most used in your market and moreover...
- ★ An understanding as to what digital ad campaigns are being run by your **competitors**.

Around the Globe adjinn Data is:

-
- Providing clients with strategic insights regarding the activity of their competitors.
 - Helping to create more convincing pitches, sound proposals and winning more RFPs.
 - Providing key insights fuelling intelligent and regular client engagements.
 - Validating the efforts being made by a contracted Agency.
 - Monitoring and keeping abreast of the sale of Publishing inventory.
 - Creating marketing materials to promote and extol campaign successes.
 - Optimising the performance of digital display and video ad campaigns.
